ACADEMIC PROJECTS

❖ Spotify Clone

Developed a full-stack Spotify clone with a responsive frontend using JavaScript, HTML and CSS.

Built the backend with Node.js and ExpressJS, handling authentication and API logic.

Utilized MongoDB for database management to store user data and track information.

❖ Zoom Clone

Created a real time video conferencing application inspired by Zoom, leveraging WebRTC for peer-to-peer communication

Designed the frontend with React and styled using Material-UI for a polished user interface
integrated Axios for HTTP requests and ensured seamless state management.

Avoided traditional backend frameworks like Express or Socket.io, focusing on MongoDB for minimal backend needs.
